

```

System.out.println("Called Square with double argument  

+ double values");
return n double * double value;
}
public static void main (String [] args)
{
    System.out.println("Square of integer 7 is 49", Square  

    (7));
    System.out.println("Square of double 75.5 is 5675.25", Square  

    (75.5));
}
}

```

Assignment on 28/1

with the use of methods, find the maximum no of integers (the code should be interactive).

What is the difference between overloaded methods, overloaded Constructors and overridden methods.
